Subject: Microsoft Settlement

I believe the settlement proposed by the Department of Justice is far too lenient -- it is a mere slap on the wrist to Microsoft, a confirmed monopolist. The settlement as proposed SHOULD NOT BE ACCEPTED. Instead, the federal government should push ahead along the lines of the other states who have not caved in the Microsoft.

The DoJ settlement will accomplish nothing, and will leave Microsoft free to continue its monopolistic ways. Please push for a tougher settlement that will more effectively restrict Microsoft.
